

NEWS RELEASE

MAY 5, 2008

MetaLight is going to be introducing, among many others, two new sconce lines this fall. Here is a sneak preview of what's to come.

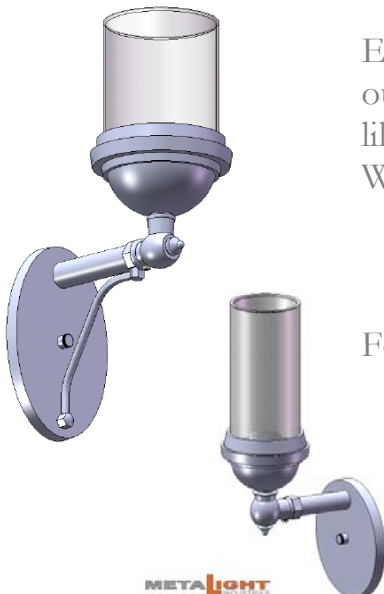

ROCKS Collection will feature a 2mm-thick metal “rock formation” around a 7” tall (6.5” showing) glass piece sitting in a hand-forged heavy brass metal base. The base and back plate will come in Antique Brass, Polished Brass, Satin Nickel and Polish Nickel finish. Bronze finish will also be available on special orders.

Customers will have a choice of two styles featuring different back plates. Glass can be ordered in clear or frosted finish.

CORNWALL Collection will feature same style back plates but will offer three different colors of glass as well as two different sizes of glass for each style without the metal around the glass.

Expect to see the first fixtures to arrive at our warehouse late August. If you would like to know more about these products and more please contact Wim Jessup at wimj@meta-light.com or (866) 570 5070 ext. 103
